SUMMARY:

Python Backend Developer with 3+ years of experience, including 2+ years specializing in backend development using Django, DRF, and FastAPI. Experienced in building RESTful APIs, enterprise workflow automation systems, third-party integrations, and asynchronous processing using Celery and Kafka. Hands-on experience with PostgreSQL, MongoDB, Redis, Docker, and cloud services (AWS, OCI). Familiar with AI-powered application development, LLM integrations, and vector search, with a strong interest in scalable backend systems and software architecture.

TECHNICAL SKILLS:

- **Programming Languages**: Python, JavaScript, TypeScript
- **Backend Frameworks**: Django, Django REST Framework (DRF), FastAPI, Flask, WebSockets
- **Databases & ORM**: PostgreSQL, MongoDB, SQLite, Django ORM, SQLAlchemy
- **Caching & Message Processing:** Redis, Celery, RabbitMQ, Apache Kafka
- **Cloud & DevOps:** AWS (EC2, S3, SNS, IAM), Oracle Cloud Infrastructure (OCI), Docker, GitHub Actions
- **Frontend Technologies:** React, Angular, Next Js, HTML, CSS, Bootstrap
- **Testing & Version Control:** Pytest, Unit Testing, Git, GitHub, GitLab
- **Data Science & ML:** Pandas, NumPy, Scikit-learn

WORK EXPERIENCE:

Python Developer *(May 2024 - Present)*

Senscript Technologies, Infopark, Kerala, India

- **CorX:** Contributed to an enterprise-grade workflow automation platform built with FastAPI and React. Developed modular integration nodes for GitHub, GitLab, Bitbucket, Todoist, Baserow, Airtable, AWS (S3, EC2, IAM, SNS), and Oracle Cloud Infrastructure using token/API key authentication and dynamic execution logic. Integrated Microsoft Teams chatbot triggers to initiate workflows and AI agents directly.
- **B2B-Project**: Developed features for a B2B business networking platform supporting chapters, franchises, meetings, and invitations using Django and DRF. Implemented an admin-configurable points system, email notifications, multi-role access control, and scheduled background tasks using Celery with Redis as the message broker. Improved code quality and maintainability by integrating pre-commit hooks with Ruff for linting and formatting and MyPy for static type checking. Wrote Pytest unit tests throughout the project to prevent regressions and improve application reliability.
- **Elearning:** Developed features for an e-learning platform supporting learning journeys, video tutorials, assessments, and department-wise leaderboards. Customized Microsoft authentication using social-auth-app-django, implemented HLS (m3u8) video streaming to reduce initial video loading time by 60%, and developed bulk data import scripts.
- **Pmtool:** Optimized API performance through database query optimization, reduced unnecessary response payloads, and implemented pagination for efficient handling of large datasets. Migrated production data from MySQL to PostgreSQL, identifying and resolving database constraint issues to ensure data integrity and application stability.
- **Other Projects:** Contributed to Kardia (Flask-based heart attack prediction), 3DVix (AI chatbot integration for 3D e-commerce) and Cadio (CRM and lead management).

Python Programmer *(Mar 2023- April 2024)*

Mentor Thesis, Kanyakumari, Tamil Nadu

- **Movie Recommendation:** Developed a context-aware movie recommendation system that suggests movies based on user preferences and contextual factors. Deployed the application on Streamlit for an interactive and user-friendly experience.

- **Sentiment Analysis:** Built a sentiment analysis application using Tkinter for the interface and Natural Language Processing (NLP) techniques to classify customer reviews as positive or negative.
- **Fault Detection in Solar Photovoltaic Systems**: Implemented a fault detection model using CSV-based sensor data, Random Forest for prediction with feature selection & extraction to improve accuracy.

INTERNSHIP:

Full Stack Python Developer Intern *(Jun 2022- Sep 2022)*

Inmakes Infotech Pvt Ltd, Kerala, India

- Built a task management (to-do) web application and contributed to an e-commerce website using Django, HTML, CSS, and JavaScript. Gained foundational hands-on experience in machine learning with Python.

Certifications:

- **Python Full Stack Developer:** Inmakes Infotech Pvt. Ltd – Python Developer Certificate
- **Problem Solving (Basic)**: HackerRank - Problem Solving Certificate
- **AI Foundations Associate:** Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Certificate
- **AWS Cloud Practitioner Essential:** Aws Skill Builder - Certificate

PROJECTS:

Pocket Flow *(Aug 2026 -Present)*

- Developed a full-stack personal finance management application to track bank accounts, credit cards, income, expenses, and EMIs. Implemented customizable categories, transaction tracking, dashboard analytics, and responsive light/dark themes.
- Actively using PocketFlow for daily expense tracking, continuously improving features based on real-world usage and feedback.
- **Tech Stack:** FastAPI, React, MongoDB, Beanie ODM, Expo
- **Links**: Demo | Frontend | Backend | APK

Weekly Zen Planner *(Jun 2026 -Aug 2026)*

- Developed a full-stack task management application with role-based authentication, weekly scheduling, task prioritization, streak tracking, and reward mechanisms. Integrated an AI chatbot for creating, updating, and completing tasks through natural language commands.
- **Tech Stack:** FastAPI, React, MongoDB, Beanie ODM
- **Links**: Demo | Frontend | Backend

Technical Blog *(Oct 2025 -Dec 2025)*

- Developed a technical documentation and learning blog using FastAPI, Next.js, MongoDB, and Beanie ODM for asynchronous database operations. Built RESTful APIs and content management features with SEO-friendly pages to share technical concepts, development insights, and hands-on implementations.
- **Tech Stack:** FastAPI, Next Js, MongoDB, Beanie ODM
- **Links**: Demo | Frontend | Backend

EDUCATION:

Bachelor of Science from **NACCAS, Kanyakumari -** *BSc Mathematics with 8.98 CGPA* (2019-2022)
